

# How To Burn a DVD on a Mac from a Video File

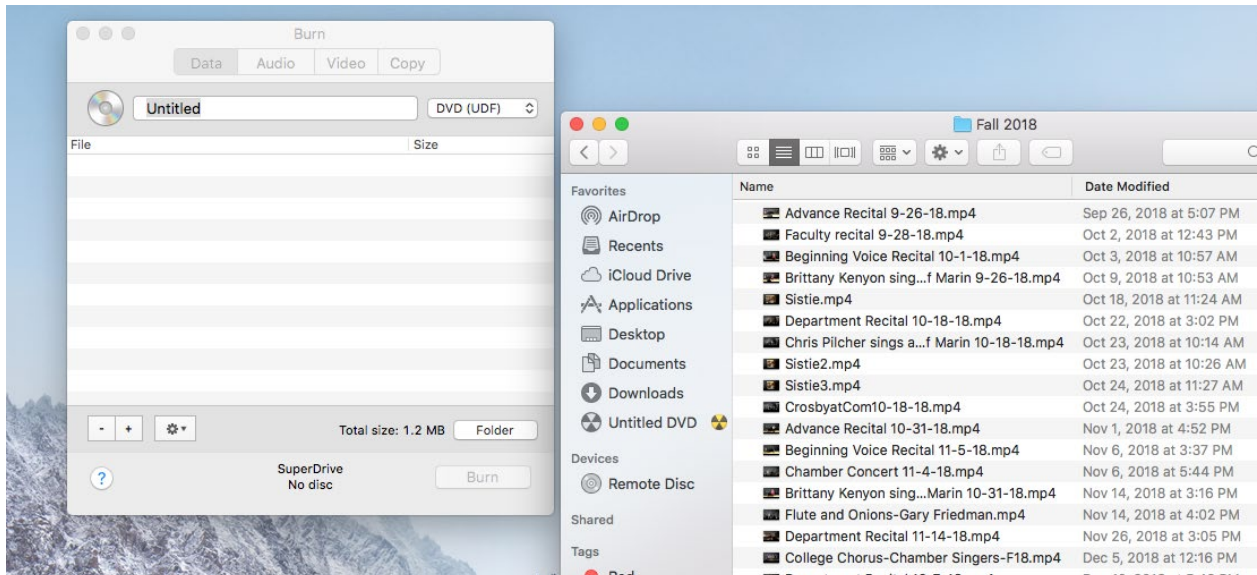

Under The Apple choose recent items and in the drop down menu choose music-share

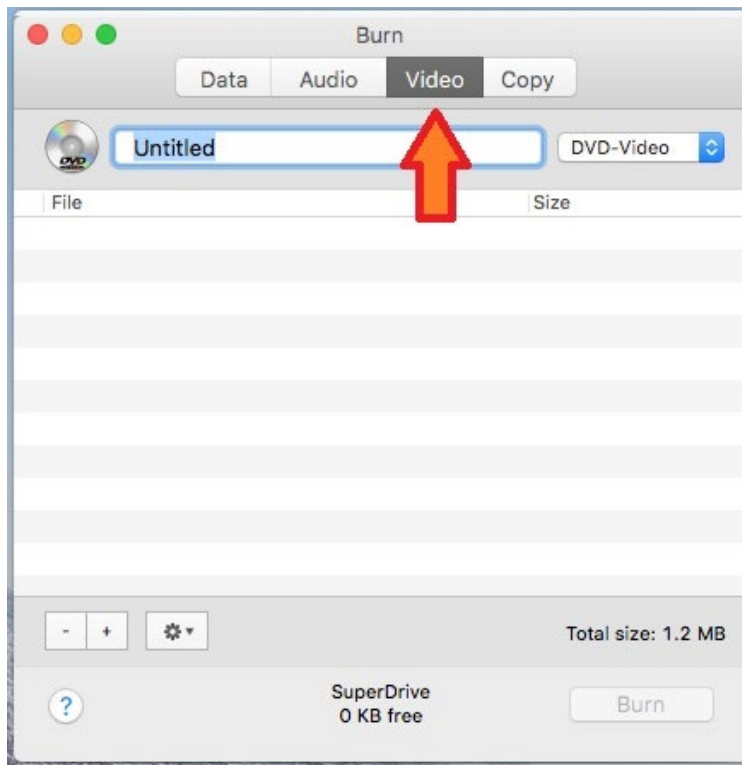

Double click the Burn icon in the Dock

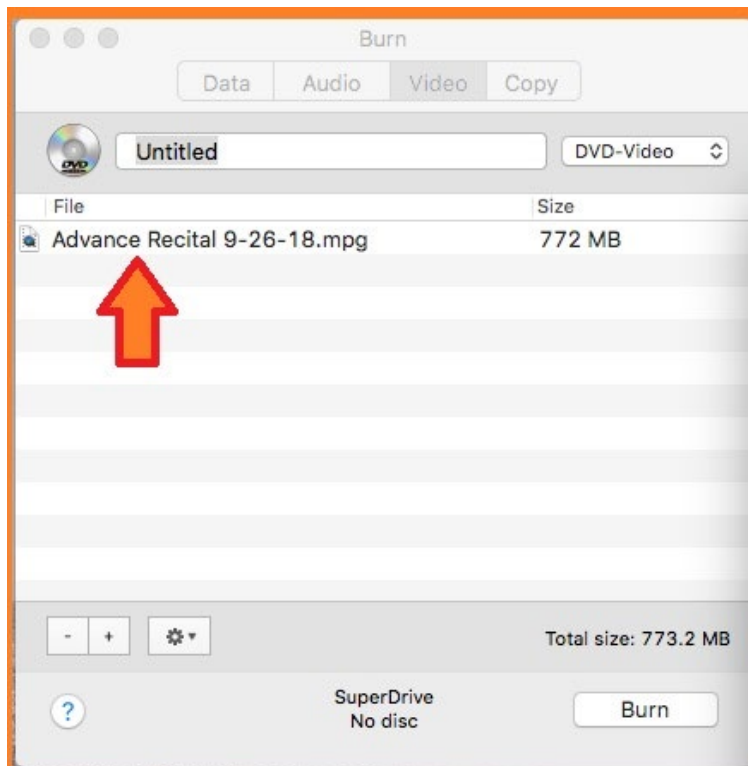

Place the Burn program and the window for the music-share folder side by side:

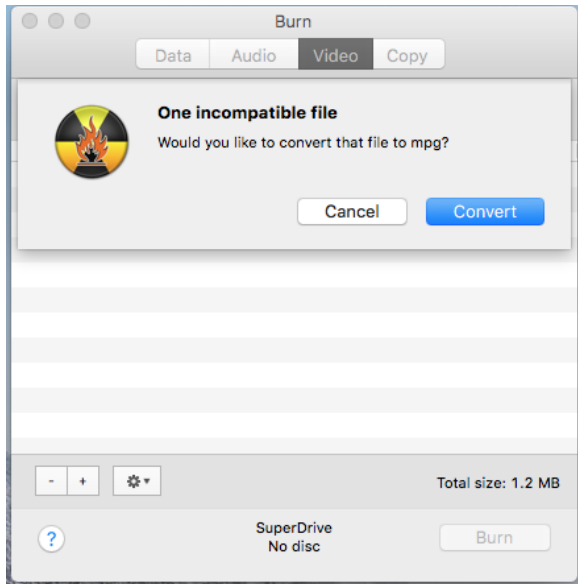

Click the Video Tab on the Burn Program:

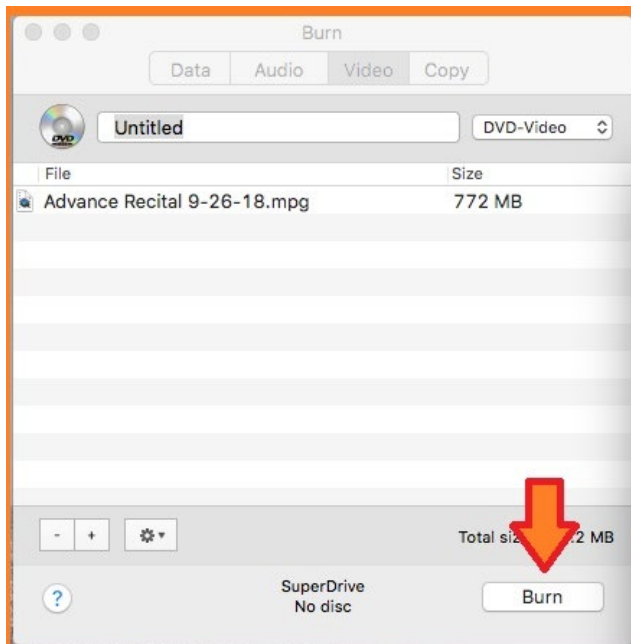

Place the desired video file in the grey and white striped panel:

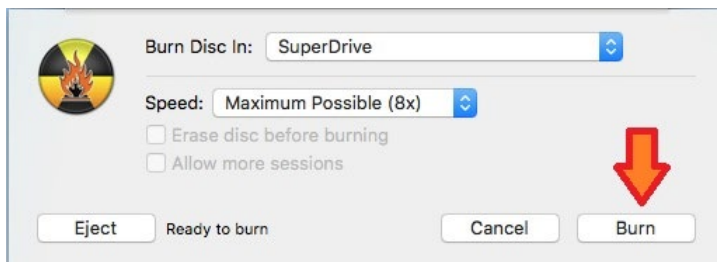

The Program will ask to convert the file. Click on convert:

After it converts Click on the Burn Button:

Place a DVD in the Super Drive and Click on Burn:

Authoring should begin. When it is complete you are done.
